

IMPROVING DEMENTIA CARE AND SUPPORT IN SCOTLAND

Gillian Barclay, Scottish Government
September 2016

Contents

- Progress and impact of Scotland's National Dementia Strategies
- Post-diagnostic support
- Proposal for 2016-19 Dementia Strategy
- Wider policy context
- EU and international perspective

Progress and impact of Scotland's National Dementia Strategies

- Diagnosis rates and post-diagnostic support
- National approach to workforce education, training and development
- NHS general acute and specialist dementia care
- National improvement support for integrated home care

Post-diagnostic support

- The LDP (Local Development Plan) Standard
- Measuring performance
- Quality
- Challenges
- Next steps

Proposal for 2016-19 Dementia Strategy

- Post-diagnostic support and integrated home care
- Palliative and end of life care
- *Promoting Excellence*
- Acute and specialist NHS care

Proposal for 2016-19 Dementia Strategy

- Working with service users and carers
- Supporting dementia-friendly communities
- Equalities and dementia
- Supporting research

Wider policy context

- Integration of health and social care
- Self-directed support
- Carers Act

EU and international perspective - European Joint Action on Dementia

- To promote the implementation in Member States of coordinated actions to improve the situation of people living with dementia and their carers. Four key areas for action:
- **Diagnosis and post diagnostic support**
- **Crisis and Care Coordination**
- **Residential Care**
- **Dementia Friendly Communities**

EU and international perspective

- G7 legacy
- Measuring global dementia standards
- WHO/UN global action on dementia
